To the Recruitment Officer

Directorate of Information Systems (DSI)

BEAC

Subject: Application for the Position of Software Development Technician

Dear Sir or Madam,

I am writing to express my deep interest in the position of **Software Development Technician** within the **Directorate of Information Systems (DSI)** at **BEAC**. It would be a true honor to contribute to such a renowned institution that plays a vital role in regional economic development. I am highly motivated to apply my technical skills and modern development practices to support your digital initiatives.

With over **three years of experience in full-stack development**, I have worked in diverse environments, including **Shintheo OU** (Belgium, remotely) and **Tameri Tech**, where I built backend solutions using **Odoo (Python)** and **Spring Boot (Java)**, and developed user-friendly frontend interfaces using **React.js** and **Vue.js**. I have also contributed to software architecture, versioning, testing, and deployment using **Docker**, **Kubernetes**, and **Git**.

What sets me apart is my drive to stay ahead of technological advancements. In recent months, I have integrated **AI tools like Ollama**, which allow me to run and interact with pre-trained large language models locally. These tools significantly enhance my development workflow — from generating code snippets, analyzing logs, automating documentation, to building intelligent assistants within applications. As AI continues to transform the software industry, I believe these capabilities are essential to scaling productivity and innovation, especially in a forward-thinking institution like BEAC.

Beyond technical expertise, I bring strong problem-solving abilities, collaboration, and adaptability. I have mentored junior developers, conducted workshops, and consistently delivered solutions that improve efficiency and user experience.

Joining BEAC represents a meaningful opportunity to contribute to impactful digital projects while growing within a structured and professional environment. I am eager to bring my experience, commitment, and AI-enhanced development capabilities to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how I can support your mission and the strategic goals of the DSI.

Yours faithfully,
Blaise Ayim Temban
